

Mobile POS Self-certified Solution Providers

THE MASTERCARD MOBILE POS PROGRAM

As the number of Mobile POS solutions increases, it becomes difficult to distinguish between the solutions that are ready to be deployed following MTIP by the acquirer and those still in the development phase. The MasterCard Mobile POS Program allows MasterCard to check if the solution has the relevant industry certifications in place, including but not limited to EMV and PCI certifications. It also allows solution providers to compare their Mobile POS solution(s) against [MasterCard Best Practices](#). The solutions that meet these criteria are registered in our program.

This document lists the detailed information on the registered Mobile POS solutions alphabetically by solution provider. However, for ease of searching, solutions have also been categorized in the first few pages according to their business models, and also to their features and capabilities.

This document lists products (the “Products”) that have been self-certified for compliance with the Mobile POS Best Practices by the named solution providers. Before listing the Products, MasterCard has taken reasonable steps to check whether the Products are appropriately certified by EMVCo LLC and the PCI Security Standards Council. MasterCard has not conducted any additional tests or certification of the products. MasterCard makes no representations or warranties of any kind, express or implied, with respect to the Products or the listing. To the extent possible in applicable law, MasterCard (and its group companies) specifically disclaims all representations and warranties with respect to the Products including but not limited to any and all implied warranties of title, non-infringement, or suitability for any purpose (whether or not MasterCard has been advised, has reason to know, or is otherwise in fact aware of any information) or achievement of any particular result.

Mobile POS Self-certified Solution Providers

MOBILE POS SOLUTION PROVIDERS LISTED BY BUSINESS MODEL

Payment Facilitator – an MPOS provider whose 1) solution includes hardware/software, and where the 2) MPOS provider owns the merchant relationship directly and 3) settles funds to the merchants account.

Platform Provider – provides a hardware and/or software solution only. This “platform” is sold to an acquirer, ISO or other party that distributes the solution and owns the merchant relationship.

Acquirer/ISO – an MPOS provider who is a MasterCard acquirer or ISO that has either built their own MPOS solution or is using a platform provider MPOS solution.
